Understanding Digital Signature Certificates DSC

Digital Signature Certificate

A DSC is a digital file that verifies the identity of the signer and ensures the authenticity and integrity of the signed document.

Secure Verification

DSCs use cryptography to create a unique digital signature for each document, ensuring that the signer and the document itself are authentic.

Legal Validity

DSCs are recognized by legal authorities and are considered legally binding in many jurisdictions.

Major Challenges Faced By Our Business

- Lack of Control on document signing

  - No Control over document Signing with Authorized Signature
  - Difficult to ensure all required signatures are obtained on time

- Frequent Mistakes in Document Validation

  - Errors in document validation frequently lead to cancellations
  - Inconsistent review processes affect document accuracy

- Vendor Payment Delays

  - Payment delays due to untimely document approvals
  - Disruptions in vendor relationships and operations

- Risk of Signature Tampering

  - Inability to control accuracy and prevent tampering of signatures
  - Compromised document integrity

- Offline Financial Record Maintenance

  - Maintaining financial records offline leads to poor fund management
  - Increased risk of errors, delayed reporting, and lack of oversight

Introducing Zignify: The Future of CMS/EIS Documentation

1 Effortless Automation

Zignify automates digital signing and printing, eliminating manual processes and reducing errors.

2 Enhanced Security

Zignify utilizes robust security features to safeguard sensitive information and ensure compliance.

3 Improved Efficiency

Zignify streamlines document workflows, saving time and resources while increasing productivity.

4 Seamless Integration

Zignify seamlessly integrates with existing CMS/EIS systems, simplifying document management and workflows.

TEQBITEZ

Government Approved CA's for DSC Issuance

CA	Purpose
Organization Certificates	Issued to businesses and organizations for signing documents on behalf of the company.
Individual Certificates	Issued to individuals for personal use, such as signing documents for legal purposes.

TEQBITEZ

Streamlining Digital Signing and Printing

1 Document Preparation

Documents are prepared and reviewed for accuracy and completeness before signing.

2 Digital Signing

Documents are digitally signed with electronic signatures that are legally binding and secure.

3 Automated Printing

Signed documents are automatically printed and distributed to the appropriate parties.

Zignify: Digital Signature Solution for CMS/EIS

Secure Digital Signatures

Zignify uses DSC (Digital Signature Certificates for secure and legally valid signatures.

Streamlined Workflows

Zignify integrates with CMS/EIS systems to streamline document signing and printing processes.

Enhanced Compliance

Zignify complies with industry regulations and standards for digital signatures and document security.

TEQBITEZ

Simplifying CMS/EIS Document Processes with Zignify

1

Document Creation

Documents are created within the CMS/EIS system, ready for signing.

2

Digital Signing

Authorized users digitally sign documents using their DSCs.

3

Document Storage

Signed documents are securely stored within the CMS/EIS system.

TEQBITEZ

Boosting Efficiency and Productivity

Time Savings

Automating document signing and printing eliminates manual processes, saving valuable time.

Improved Productivity

Zignify streamlines workflows, allowing employees to focus on more strategic tasks.

Reduced Costs

Zignify reduces operational costs by minimizing paper usage and manual processes.

Increased Satisfaction

Zignify improves employee and customer satisfaction with faster, more efficient processes.

TEQBITEZ

Secure and Compliant Signing Workflows

Secure Encryption

Zignify utilizes robust encryption protocols to safeguard sensitive data during transmission and storage.

Audit Log

Zignify maintains a detailed audit trail of all document signing activities, ensuring accountability and compliance.

TEQBITEZ

Seamless Integration with CMS/EIS Systems

Zignify integrates seamlessly with leading CMS/EIS systems, including SAP, Oracle, and Microsoft Dynamics. This integration streamlines workflows, automates document processes, and ensures data consistency across platforms.
